

Centrifugal pump

NC-300R1

# NC-300R1 SERIES **CENTRIFUGAL PUMP**

Centrifugal pumps of NC-300R1 series is intended to pump various liquids:

- abrasive hydraulic fluids (clay and gravel mortars, mixtures of water and sand, ore, etc.);
- flushing liquid used in the course of well drilling;
- household and industrial waste waters;
- spent flushing liquid (into cyclone plant to clean it of drilled solids;
- cement mortars.

### Advantages of centrifugal pump NC-300R1:

- simple maintenance;
- light weight;
- -compact size:
- extreme durability:
- minimal installation space requirements;
- all parts are steel casted:
- -stainless steel impeller;
- increased wearing resistance of pump components;
- horizontal or vertical layout;
- versatile, modular design that allows customers to purchase only the parts necessary for repairs;
- ability to alter rotation direction, which is possible because it is simple to install an impeller suitable for the necessary rotation and volute direction (only the impeller is to be replaced, while all other parts remain the same):
- exposed impeller.

### Pumped fluid properties:

hydraulic fluid density, kg/m<sup>3</sup> up to 2500 temperature. °C +5 ... +55 solid particle content up to 60% solid particle maximal size, mm at most 20

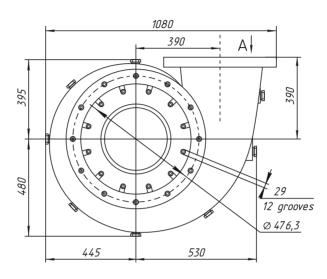

**Technical specifications:** Pump overall dimensions (LxWxH), mm 1160x1080x870 350 (14") ASME/ANSI B 16.5 Class 150 Inlet port diameter, mm Outlet port diameter, mm 305 (12") ASME/ANSI B 16.5 Class 150 Impeller diameter, mm 535 (21") Maximal speed, rpm 1800 Weight, kg, ±3% 750 Maximal head, m 90 Maximal flow, m<sup>3</sup>/h (L/s) 2000 (555) Component materials:

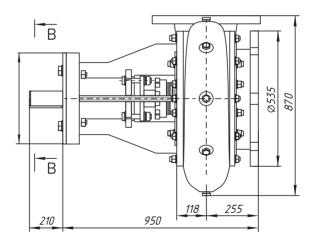

Impeller 20H13L Other components (castings) 40HL Other components (except castings) 40H

## Pump modifications

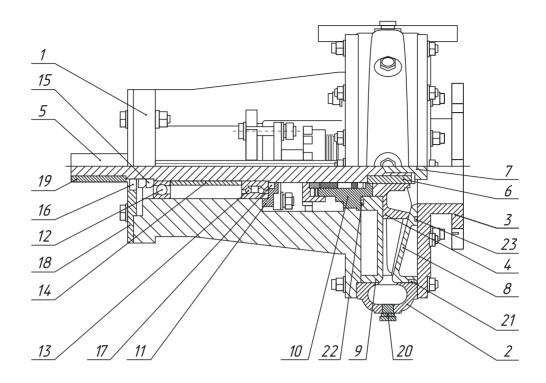

Typesize	Pic.	Connection	Rotation
NC-300R1	1	Coupling	C.W.
NC-300R1-01	2	Coupling	C.C.W.

## Additional parameters

Name	The option of the performance	
Shaft seal type	Gland seal	
	Mechanical seal	

Centrifugal pump NC-300R1 manufactured by Rosneftegazinstrument is a small and compact device intended for high pressure feeding of thee-cylinder piston pumps involved in wells operation. It is specially designed to pump abrasive mixtures (sludge) and cement mortars. The pumps are manufactured by means of contemporary CNC equipment. Our centrifugal pumps are suitable for various industries.

Centrifugal pump NC-300R1 (14"x12"x21"). Structure.

1 2	body volute diffuser with outlet fitting 12"
2 3 4 5 6 7	inlet fitting 14"
